

TeccWeb APR Validation Dashboard

Epicor's APR what is it?

Epicor APR offers built-in, easy-to-use tools to quickly create, route, and format your reports according to the various requirements of internal and external recipients. You can send order confirmations or invoices to customers, generate and submit required financial reports and deliver parts reports or pick-lists to your operations personnel.

With Epicor APR, your organization can reduce reporting errors, improve customer satisfaction, and eliminate the hassle of supporting additional applications. You benefit from an integrated print management and document distribution system that includes cost and time savings, ease of use, flexibility and improved efficiency.

So why do we need a Validation Dashboard?

Epicor delivers the tools and the platform required to make the APR routings. What it doesn't do is meet the human need for verification. In the real-world, users want confirmation that the automated processes are doing exactly what they are supposed to do. The APR tools that Epicor includes with the APR module do not supply a simple, visual way to inspect the results of the automated delivery of the documents. **TeccWeb** has heard time and time again that the users expect feedback from the automated process.

For example, if you send a batch of nightly invoices to the customers, the AR Clerk is going to want assurances that the invoice batches were delivered correctly. With the **TeccWeb APR Validation Dashboard**, you get simple straight forward solutions to these real-world problems. The **TeccWeb APR Validation Dashboard** is designed to monitor various areas within the E10 environment, specific to the APR routings, and deliver the results of this investigatory process, back to the users, in a simple interface integrated into the E10 environment. No more sifting through hundreds of entries in the Task Monitor or designing custom views or reports. The **TeccWeb APR Validation Dashboard** is a pre-built solution that saves invaluable time, every day.

APR Routings supported in the Dashboard:

1. AR Invoices
2. AP Remittances
3. Sales Order Acknowledgments
4. Purchase Orders
5. Packing Slips
6. QuickShip Tracking Numbers
7. Customer Statements
8. Customer Quotes
9. Quote Auto Scheduled Follow-up

TeccWeb is constantly adding new APR routings to the dashboard. Should you have a routing you would like added, please reach out and our expert technical staff will find a way to include it.

Invoice	Cstak ID	Name	Email	Last Emailed Date	Email Count
10276	DALTON	Dalton Manufa	CostPm@	10/30/2020	1
10276	ADDISON	Addison INC	CostPm@	10/30/2020	1
